

ARCHITECT NATURAL STONE

Exclusive New Collection 2009

info@innovativestone.com

ARCHITECT NATURAL STONE COLLECTION **Interior / Exterior / Dimensional Stone**

The forefront of Design. History Reinvented. Innovative Stone's new natural stone collection. This collection features some of the world's finest white stones used architecturally, dating back to the 4th Century. From Imperial Palaces to high profile government buildings, this stone has been used to create some of the most detailed architecture including the White House in Washington D.C.

Its technical properties place this stone in a classification between marble and limestone, diversifying its use in the architectural world. It has been carved by the hands of man into magnificent sculptures, to the use of reconstruction in historical buildings.

Today, the power of machinery entering the old world and our strength of global resourcing is a combination that provides greater exposure and use of what our world has to offer. More hands to touch this beautiful collection and more eyes to appreciate another one of mother earth's amazing resources. *Contact your sales representative for more details on this and other product offerings for your next project at **info@innovativestone.com** or 1.800.62.STONE.*
